DOWNLIGHTING

OVERVIEW

This chandelier with SCENE MASTER™ technology has three distinct layers of lighting including indirect LED uplighting, LED downlighting and ambient lighting. Each layer of lighting can be controlled independently or mixed together to create countless lighting scenes. The SCENE MASTER™ technology requires no additional wiring, just a single circuit. We incorporated the wireless technology directly into the fixture by installing three Lutron Caseta dimmers into the canopy of the chandelier.

INTEGRATION

The SCENE MASTER™ technology can be controlled by up to ten Caseta Pico remotes and works with countless smart home devices including Amazon's Alexa, Google Assistant, Apple HomeKit, Nest, Sonos, Samsung SmartThings, and Hunter Fans.

Caseta Pico 3-Scene remote included

OPTIONAL FEATURES

Use the SCENE MASTER™ technology to control the chandelier from anywhere in the world when you have internet access. Simply download the Lutron app and connect with the optional Caseta Smart Bridge (not included) then use your smartphone or tablet to control the device. Turn the chandelier on and off to give the appearance that someone is home while you are away. Activate voice control using Apple HomeKit, Amazon's Alexa or Google Assistant to change scenes or turn the fixture on or off.
